EXECUTIVE SUMMARY
Aligula dispensary is a community project aimed at helping the residents in receiving proper and quality health services. This is in a bid to save the locals from travelling long distances to access health facilities. Additionally Aligula village and its vicinity has experienced an increase in population thus a need to provide such a basic need.

It is a community owned institution run by the founding committee members which comprises of the locals in partnership with the constituency’s leadership. The dispensary will be located along Soy-Turbo road in Likuyani constituency, Kakamega County which is 25 kilometres from Eldoret town.

The dispensary will provide affordable primary health care services to a population of 12 villages of approximately 19,000 people in Likuyani constituency, Kakamega County. The project includes Public Health supervisor, Birth attendant, Nutritionist-cum-Health Educator and supervisory technical staff providing support to field staff. The focus of the project is on general health, family planning and mother and child Immunization.

MISSION
To construct a health facility.

VISION
To have a healthy community

OBJECTIVES
a) To reduce the incidence of mortality and morbidity, malnutrition antenatal care, post-natal care and Immunization services.
b) To support and supplement special health related activities and preventive programs such as literacy training for sanitation and low cost methods of providing safe drinking water and hygienic latrines.
c) To provide employment to the locals and help them improve their living standards.
d) To treat needy patients particularly destitute families.
e) To eradicate poverty
f) To sensitize the community about HIV/AIDS and other sexually transmitted diseases.
ESTABLISHMENT OF THE PROJECT

Following the distance the locals have to cover in order to access health services, the increasing population and expensive health services, the committee (listed below) saw the need to construct a dispensary to address this need in 2010. This was followed by mobilization of the community to strategize on how to fulfill this mission.

The committee with the help of the public health office identified one-acre piece of land that is suitably strategically placed for the facility. The said parcel of land has not been fully paid for due to financial constraints. However, this challenge will be offset through household *harambees* (fund-raising) and contribution from other well wishers.

The successful establishment of this premise will ensure an improved quality of life through providing clean water, health services, and prevention of communicable diseases, creating awareness concerning health, immunization programmes and provision of nutritional information. After the completion of the initial plan, the government will ensure the supply of medicine and medical equipment.

The committee members are:

1) Rev. Johnstone Njomo  
2) Mr. Joel Koech  
3) Mrs. Jane Kirui  
4) Mrs. Stella Cheruiyot  
5) Mrs. Violet Sakwa  
6) Mr. Shadrack Nyongesa  
7) Mr. Moses Inziani  
8) Mr. Ambrose Koech  
9) Mrs. Monica Wafula  
10) Mr. Justus Simiyu  
11) Mrs. Risper Wekesa  
12) Mrs. Anne Mukusu  
13) Mr. John Karanja  
14) Mr. James Simiyu  
15) Mrs. Sylvia Cheruiyot

FINANCE
Currently, the project relies on the community’s contribution of money from each household quarterly. This money will be used to finance part of our mission. Some committee members have pledged to contribute 20% of the initial building materials.

With the help of a registered government engineer, the work plan and quotation of the facility is currently under progress. Our hope that the Constituency Development Fund Kitty would help us has not been realized since 2010 thus putting us in the current financial situation.

CONCLUSION
With the availability of resources, we hope to bring the project into completion in 2014/2015. Other sources of funding will be sought to supplement what we have and enable the future expansion and improvement of the facility.
